

# Data for SES Leaders

AGSM @ UNSW Business School

The APS Data Profession has partnered with AGSM @ UNSW Business School to co-create the Data for SES Leaders program, launching in 2026. This program is designed to equip senior and emerging APS leaders with the mindset and capability to lead more confidently in a data-rich environment. Participants will develop the skills to identify relevant data, interrogate evidence, challenge assumptions, and make transparent, defensible decisions that drive public value. Through applied sessions on data driven decision-making, foresight, data ethics, and storytelling, participants learn how to translate data into insight, insight into action, and action into measurable impact.

The program is delivered via online learning across 6 weeks, combining:

- Weekly 90 minute interactive webinars
- Online self- directed learning
- Supported by the AGSM Navigator digital platform for resources, reflection, and progress tracking
